Also- can you give me more details on who is requesting that we hold a community meeting and what ORC's role would be in advising as such? Thanks Ruben!

Hi Lynde,

Attached are the filings since the beginning of this year. As for the reports of negative pressure, the defendants have an obligation to continuously report, so this same report was filed on 1/7, 2/4, 3/4, 4/7 and 5/6, but I've only attached one.

Our judge in this case retired in December of 2021. A new judge has not been appointed to this case yet. A judge has been chosen to take the previous judge's place and she was sworn in a few weeks ago, but there still hasn't been a notice of reassignment. We're continuously monitoring the case for any change in that.

As always, I'm happy to provide any other info you need. Just let me know!

Best regards,

Jackie

Good Morning Jacqueline, Bruce, and Cholla- Hope you all are well!

Jacqueline,

Our Headquarters counterparts have requested an update in the Sterigenics case if you have a moment to update EPA (it has been since January 2022 since our last update with you all). If there have been any filings or movement in the Sterigenics case, I will forward those to our HQ folks. Thank you for continuing to provide us with information on the case. We very much appreciate it!

Lynde

Hi Lynde,

Yes, I am and of course. Attached is the order denying the defendants' motions to dismiss and their Report Concerning Its Installation of the Negative Pressure System.

Please let me know if there's anything else I can send your way. I'm happy to help.

Regards,

Jackie

Good Morning Jacqueline,

I hope you are still the correct contact to receive updates on the Sterigenics, Santa Teresa Facility, state court litigation matter. Our Headquarters counterparts have asked for an update in the cases as there may have been a recent order from the court or some kind of report filed in the matter? Any attachments that you can easily send so that I can share would be most appreciated. Apologies again for having to lean on you all – I really wish our Westlaw account allowed us access to state court matters!

Many Thanks,
Lynde

Good morning,

I'm one of the attorneys working on the Sterigenics matter. Cholla asked me to reach out to you to provide an update on this case.

By the June 2021 injunction order, the parties were required to meet and confer to discuss an appropriate protocol to monitor Sterigenics' compliance with the injunction order. Unfortunately, we weren't able to agree on a protocol and on October 28, we had a hearing at which we presented several options for monitoring for the Judge to decide.

Also on October 28, the Judge heard arguments on the defendants two motions to dismiss. One motion to dismissed was based on lack of jurisdiction. For that motion, the judge stayed a hearing on the motion until we were allowed to do jurisdictional discovery (the discovery is out, we're meeting and conferring and anticipate a motion to compel soon). The second motion was for failure to state a claim. The judge denied that motion. I'm attaching a copy of the proposed order we submitted to the judge yesterday. Please let me know if you'd like copies of the briefing on these two motions.

I'm attaching their proposed monitoring protocol that they filed. Since the judge did not request that we file the protocols, we did not file ours, but I'm happy to set up a call to talk about our proposals if you'd like.

Please let me know if you'd like any further information or if you'd like to discuss any of this further.

Regards,

Jackie

Good Afternoon Bruce and Cholla,

I am reaching out to you all to check on the status of the NM Santa Teresa facility/Sterigenics state EtO matter that was filed in the 3rd Judicial District Ct. Our Office of Air & Radiation in Washington D.C. has asked Region 6 for any updates in the case (recent filings). If you have any information that you could please share with us – much appreciated!! The last filing we saw was a June 2021 injunction (attached) where the company was to file an air monitoring protocol for fugitive emissions. I am wondering if there has been movement on that front? Many thanks for any updates that we can share with our Office of Air counterparts.

Good Afternoon,

I serve as the Branch Chief for ORC's Multimedia Counseling Division. To date, our section has not received any information on the state case. This could be a

symptom of office closure, delays in mail, etc. Unfortunately, we also do not have access to PACER or access to state law matters on Westlaw. To get caught up and to best determine when/where/how EPA has been brought into the matter – I am hoping there is someone from your respective offices that could please send the entire state case file (pleadings, filings, etc.). That will help determine a path forward and better understand where any correspondence may have been mailed. I am a bit surprised to see that EPA is subject to an order to file an amicus brief and the timing of such – if you all have been in touch with someone from our Headquarters office on the matter, please let us know. I will need to coordinate with our Office of General Counsel who typically has the lead on litigation matters in coordination with DOJ – but here we are not in the typical Petitioner/Respondent context. Thank you in advance for any assistance and information you can provide.

Here is the order, James. 45 days from April 22. Let me know if you need the pleadings to see the issues. I think in part this stems from the question of assertion of primary jurisdiction, or not.
